

*DESIGNED TO*  
**MOVE**

*Seeds That Float, Fly or Hitchhike  
through the Desert Southwest*

**10.30.2018**

**SAVE THE DATE**

Join the Biomimicry Center at Arizona State University for a celebration of nature's design genius!

Stop by our newly remodeled digs and discover how looking to nature has helped architects from the Tempe-based Architekton to redesign a more sustainable office space. Then walk next door and learn how desert seeds are inspiring designs for self-activated robots and more efficient wind-turbine blades in the special exhibition "Designed to Move: Seeds That Float, Fly or Hitchhike through the Desert Southwest." This surprising, up-close look at the beauty and functional diversity of desert seed designs features work by Arizona photographer Taylor James.

**Date** Tuesday, Oct. 30, 2018

**Time** 5–8 pm

Gallery Talk @ 6 pm

**Location** 1st Floor  
Design South Bldg.  
The Design School

Arizona State University  
810 S. Forest Ave.  
Tempe, AZ 85287-1605

**THE BIOMIMICRY  
CENTER** AT ARIZONA  
STATE UNIVERSITY

"Designed to Move" is organized by the Biomimicry Center at Arizona State University in collaboration with the Desert Botanical Garden, Phoenix, and Arizona State University's Herbarium and Design School.
